“Managing the Critically Ill Child”

Thursday 8th May 2025

At Engineers House Conference Centre
Bristol, BS8 3NB

The South West Paediatric Critical Care Operational Delivery Network in collaboration with the South West Critical Care Network will be hosting a free clinical update day on the management of the critically ill child.

Following the success of the day held in Exeter in October 2024, we are delivering the same event in Bristol.

The day is aimed at Clinicians, Nursing and AHP colleagues that manage critically ill children locally in the South West region prior to transfer to PICU.

The day will include interactive case study sessions using an A to E approach in managing the critically ill child.
